

THE SIDETRACKER *ADVANTAGE*

3000KG TO 6000KG HEAVY DUTY REACH TRUCKS

Sidetracker manufacture compact high capacity reach trucks with capacities from 3 to 6 tonnes, giving the ability to handle heavy pallets and loads which are deeper than standard pallets, such as double deep loads.

These reach trucks can match the footprint of lower capacity reach trucks.

Standard Sidetracker internal components are used for ease of servicing, whilst manufacturing to the capacity required.

If a multi-directional reach truck is the solution needed, we also manufacture that type of truck.
