

THE ST SIDETRACKER ADVANTAGE

WALK BEHIND HIGH CAPACITY TRUCKS

When traditional fork lift trucks are too expensive and bulky, yet standard walk behind machines are too small, of insufficient capacity, and not designed around your product, Sidetracker can offer a versatile and imaginative solution.

Sidetracker can design and manufacture the ideal walk behind or platform controlled machine to handle bulky and heavy loads, such as large cable drums, engines, press

tools etc. The ability to lift these heavy items can also be specified. We have technically qualified staff to enable us to offer a design service, which is matched by our engineering and manufacturing facility, giving us the ability to find a solution for your special material handling requirements.

Sidetracker offers a free on-site consultancy service to see if we can offer a solution relevant to your needs.
