

# THE SIDETRACKER ADVANTAGE

## GAIN MAJOR COST AND EFFICIENCY ADVANTAGES BY USING SIDETRACKER INSTEAD OF SLOW CRANAGE

Sidetracker Engineering can offer major advantages to metal stockholders currently using cramage.

First of all it stops the safety issue of personnel climbing onto loads to sling them.

Secondly it reduces the number of people needed to handle a load.

Then thirdly it allows the opportunity to increase the stockholding without moving or extending the premises by utilizing the height and volume of the building.

Most of all it increases the speed of stock retrieval by several hundred percent, due to the intrinsic efficiency of the system, and the elimination of the need to move stock to reach other stock underneath.

Sidetracker Engineering offer free site analysis to advise whether such advantages apply in your operation.
